IMPACT

85%⁺ API Latency Reduced

1M⁺ Monthly Transactions

10K⁺ Enterprise Users

99.9%⁺ System Uptime

50K⁺ Daily Active Users

200⁺ Students Mentored

SKILLS

Languages

Python | TypeScript | Java | JavaScript | C#

Frameworks

FastAPI | Django | React | Spring Boot | Node.js

Cloud & DevOps

AWS | Kubernetes | Docker | Terraform | Jenkins

GitHub Actions

AI & Data

LangChain | RAG | GPT-4 | Redis | Kafka

PostgreSQL

EDUCATION

Northeastern University

MS Computer Software Engineering
Jan 2024 - May 2026 | Boston, MA

VIT University

BTech Mechanical Engineering
Aug 2018 - May 2022 | Vellore, India

BRAND

"Engineer who ships --
backend to AI."

Available May 2026

Engineer who ships -- backend to AI. Full-Stack | Distributed Systems | Applied AI | Available May 2026

WORK EXPERIENCE

Dassault Systemes SolidWorks

Jan 2025 - Sep 2025

Software Engineer Co-op | Waltham, MA

- > Led monolith-to-microservices migration of 4 legacy Perl/C# apps to TypeScript on Kubernetes -- eliminated deployment outages for 10K+ enterprise users
- > Reduced API latency 85% (3s to 450ms) by designing centralized REST service layer with Swagger contracts
- > Built Fluent Bit and Elasticsearch observability pipelines -- cut debug time from hours to minutes
- > Reduced microservice integration time 40% via internal NPM package with automated CI/CD

Deloitte

May 2022 - Dec 2023

Software Developer | Hyderabad, India

- > Built Python/Django + React fintech platform -- 1M+ monthly transactions at 99.9% uptime, PCI-DSS compliant
- > Architected RabbitMQ event pipeline across 8 microservices -- 50K+ daily transactions, zero message loss
- > Improved API response times 60% for 5K+ concurrent users with Redis caching and Celery task queues
- > Cut deployment failures 90% and release cycles from bi-weekly to daily with Jenkins and Docker

Zomato

May 2020 - Sep 2020

Software Developer Intern | Bangalore, India

- > Improved search response time 30% for 50K+ daily users via React and TypeScript optimizations
- > Boosted search success rate from 65% to 92% with Elasticsearch fuzzy matching and synonym mapping
- > Enabled real-time order tracking for 10K+ concurrent sessions via WebSocket and Redis pub/sub

FEATURED PROJECTS

LLM Document Intelligence

GPT-4 + LangChain + FastAPI with RAG. 85% answer accuracy on unstructured documents.

GPT-4 | LangChain | FastAPI | RAG

Cloud Infrastructure Automation

AWS + Kubernetes + Terraform. Automated CI/CD + Prometheus/Grafana real-time monitoring.

AWS | Kubernetes | Terraform | GitHub Actions

Madison MAB -- AI A/B Testing

Thompson Sampling to identify winning customer segments faster than traditional A/B testing. Live on Hugging Face.

Python | Gradio | Thompson Sampling

Swadh Food Delivery

Co-founded hyperlocal food delivery platform. 100+ restaurants, 2,000+ active users across Vellore.

React | Node.js | MongoDB | Co-Founder

LEADERSHIP & ACHIEVEMENTS

Graduate Program Assistant -- Northeastern

Supporting 200+ MS students through code reviews, system design sessions, and technical coursework collaboration.

Co-Founder -- Swadh Food Delivery

Led 4-person cross-functional team from ideation to production. 100+ restaurants, 2,000+ active users across Vellore.
