PRESENTER

Mithran Ezhilarasan

— BRAND INTRODUCTION — 1 MIN

The problem no tool was solving.

“Most teams don’t have a data problem.
They have an **interpretation** problem.”

— vigilixx brand voice · Substack article, April 2026

Data without a scoring layer is noise at scale. vigilixx was built to close the gap between raw market data and a decision worth making — before the window closes.

BRAND NAME

vigilixx — from **vigilance**. The double-x signals precision and permanence.

POSITIONING

AI-powered market intelligence for teams who can’t afford to be caught off guard.

ARCHETYPE

The Vigilant — strategic, disciplined, always ahead of the signal.

BRAND ESSENCE

Always watching. Always ready.

— BRAND STRATEGY — 2 MIN

Positioned where the market has a gap.

TARGET PERSONAS

The Stretched Analyst

Mid-market B2B SaaS. Too much data, no prioritization layer. Six tabs open, three dashboards, one spreadsheet nobody updated — drowning in noise while competitors make moves.

The Reactive Founder

Early-stage startup. Learns about a competitor's \$10M funding round from a recruiter — three weeks after the fact. The market moved. The team didn't. That's not a data problem.

COMPETITIVE POSITION

Crayon/Klue = enterprise, \$20K+/yr contracts. Free tools = raw feeds, no intelligence layer. **vigilixx owns the middle** — 90% of the value, \$0 onboarding, under 5-minute detection window.

5 BRAND PILLARS

- **Precision over volume** — scored signals, not raw feeds. Intelligence means selection.
- **Speed as strategy** — intelligence before the market catches up. The 5-minute window.
- **Built by engineers** — technical credibility embedded from day one. No enterprise theatre.
- **Accessible intelligence** — no six-figure contract, no analyst team required.
- **Radical transparency** — every score is explainable. No black-box outputs.

UNIQUE VALUE PROPOSITION

vigilixx turns market noise into scored, actionable intelligence in under 5 minutes — without a six-figure contract.

— VISUAL IDENTITY — 2 MIN

A brand built for credibility at first glance.

LOGO SYSTEM

**vigilixx**

Radar arc mark + wordmark. Neon cyan dot = live signal. Scales from 16px favicon to full-width hero.

 BRAND STORYTELLING — 3 MIN

Two stories. One brand truth.

Framework: Hero's Journey

Story 1 — The Origin

THE ORDINARY WORLD

Every analyst I knew was drowning — not in a lack of data, but in too much of it. Six tabs open. Three dashboards. One spreadsheet nobody updated. The work felt productive. The intelligence was missing.

THE TURNING POINT

A founder learns about a competitor's \$10M funding round from a recruiter — three weeks after the fact. The market moved. The team didn't. That's not a data problem. It's an intelligence gap.

THE TRANSFORMATION

vigilixx was built to close that gap — a scoring layer that surfaces only what matters, before the window closes.

BRAND CONNECTION

Precision over volume. Speed as strategy.

Framework: Problem-Agitate-Solve

Story 2 — The Transformation

PROBLEM

Mid-market teams can't afford Crayon or Klue. Free tools give them raw feeds with no interpretation. They're making reactive decisions based on yesterday's news.

AGITATE

The teams that win aren't always the best resourced. They're the ones who figured out, earliest, what the market was trying to tell them — and acted before everyone else caught up.

SOLVE

vigilixx delivers scored, explainable market intelligence in under 5 minutes. No enterprise contract. No analyst team. The signal — without the noise.

BRAND CONNECTION

Accessible intelligence. Always watching. Always ready.

— MADISON AI TOOL — LIVE DEMO — 4 MIN

vigilixx in action — real intelligence, real time.

1

Open the live website 0:30

Navigate to v0-vigilixx-ai.vercel.app. Walk through the landing page, hero section, value proposition, and CTA. Show brand consistency: navy background, teal accents, Space Grotesk typeface throughout.

2

Launch the intelligence pipeline 1:30

Open the n8n workflow on Railway. Enter a real topic — “OpenAI” or “AI agent frameworks.” Show RSS feeds being ingested, GPT-4o-mini scoring each signal, prioritization in real time.

3

Walk through the scored output 1:30

Walk through the executive brief: signal source, relevance score, recommended action. This is the differentiator — ranked, explainable intelligence ready for a decision-maker, not a raw data dump.

4

Connect to brand UVP 0:30

“90% of the value of a six-figure enterprise tool, live in under 5 minutes. No contract. No setup. Just signal.”
