

Sai Manasa Karanam

Cloud and AI Engineer

Sai Manasa Karanam

Cloud and AI Engineer

Brand Introduction: SMK

A cloud and AI engineer bridging enterprise infrastructure and intelligent automation.

Brand Pillars

Connecting cloud engineering with AI implementation.

Proven Delivery

3+ years enterprise Azure experience at Accenture.

Educator Mindset

Teaching AI integration to graduate students at Northeastern.

Professional Profile

Who I Am

Key Professional Highlights:

- 3+ Years at Accenture: Extensive experience in a leading technology consulting firm.
- 40% Performance Improvement Delivered: Quantifiable impact on operational efficiency.
- 6 AI Bootcamp Sessions Led: Demonstrated expertise and leadership in AI education.
- 5 AI Projects Built: Proven track record in developing and implementing AI solutions.

Educational Background:

MS Information Systems

Northeastern University, Boston

GPA: 3.7

Expected Graduation: May 2027

BE Electronics and Communication Engineering

Anna University Chennai

Graduated: 2021

Previous Role:

Software Development Engineer (SDE) at Accenture, promoted to SDE-2.

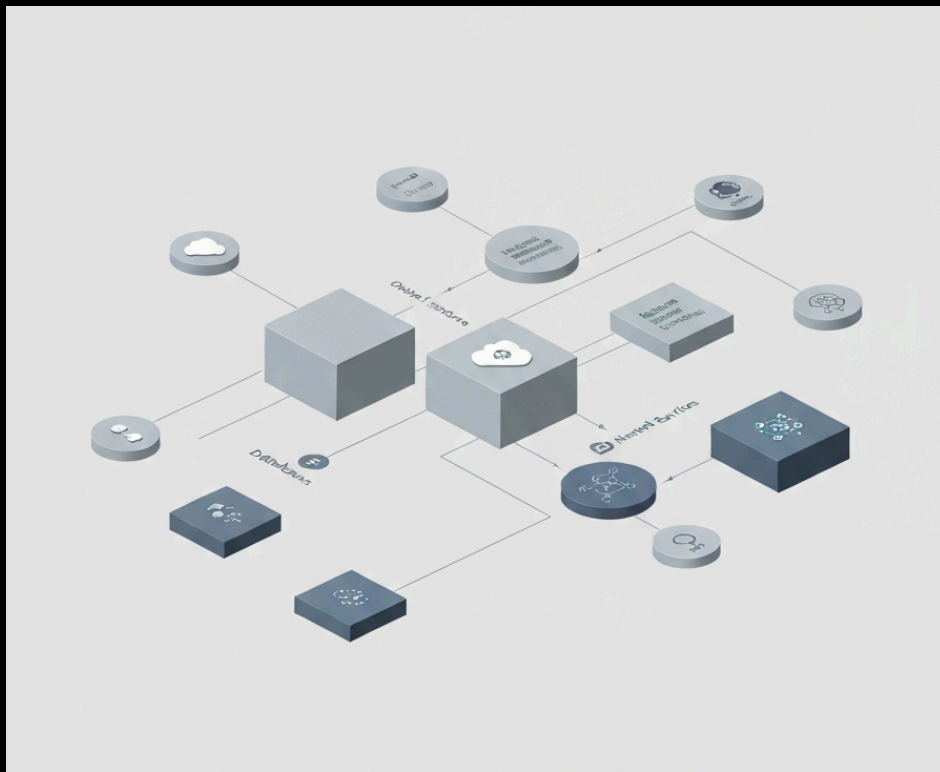

Career Timeline

Key Milestones and Achievements

Brand Strategy: Unique Value Proposition

Sai: The Intersection of Cloud Infrastructure and AI Implementation

- **Enterprise Production Experience**
Proven track record building Azure systems at Accenture.
- **Hands-On AI Tool Building**
Expertise with cutting-edge tools like Groq, Gemini, Claude, and n8n.
- **Clear Communication Skills**
Graduate-level teaching experience simplifying complex concepts for non-technical audiences.

Unlike generic career coaches or AI influencers, Sai brings lived enterprise experience, practical building skills, and effective teaching – a unique blend for impactful guidance.

Personas

Brand Strategy: Target Audience Personas

Persona 1: The Infrastructure Engineer

Name: RoshanJahan Khan

Age: 28

Role: Cloud Engineer (4 years experience)

Pain Point: Feels left behind by the AI wave; unsure how to integrate AI into cloud skill set.

Goal: Transition into AI-enabled cloud roles.

How SMK Helps: CloudPath AI roadmap + personal guidance call.

Persona 2: The Career Switcher

Name: Shravya Pokalkar

Age: 25

Role: MS student or recent graduate

Pain Point: Lacks a personalized path into cloud and AI; overwhelmed by generic advice.

Goal: Land their first cloud or AI role.

How SMK Helps: CloudPath AI roadmap + resume and LinkedIn guidance.

Website Portfolio Showcase

Hero Section:

- SMK monogram in the navbar
- Name and tagline prominently displayed in brand colors
- Clear Call-to-Actions (CTAs): "View My Work" and "Connect on LinkedIn"

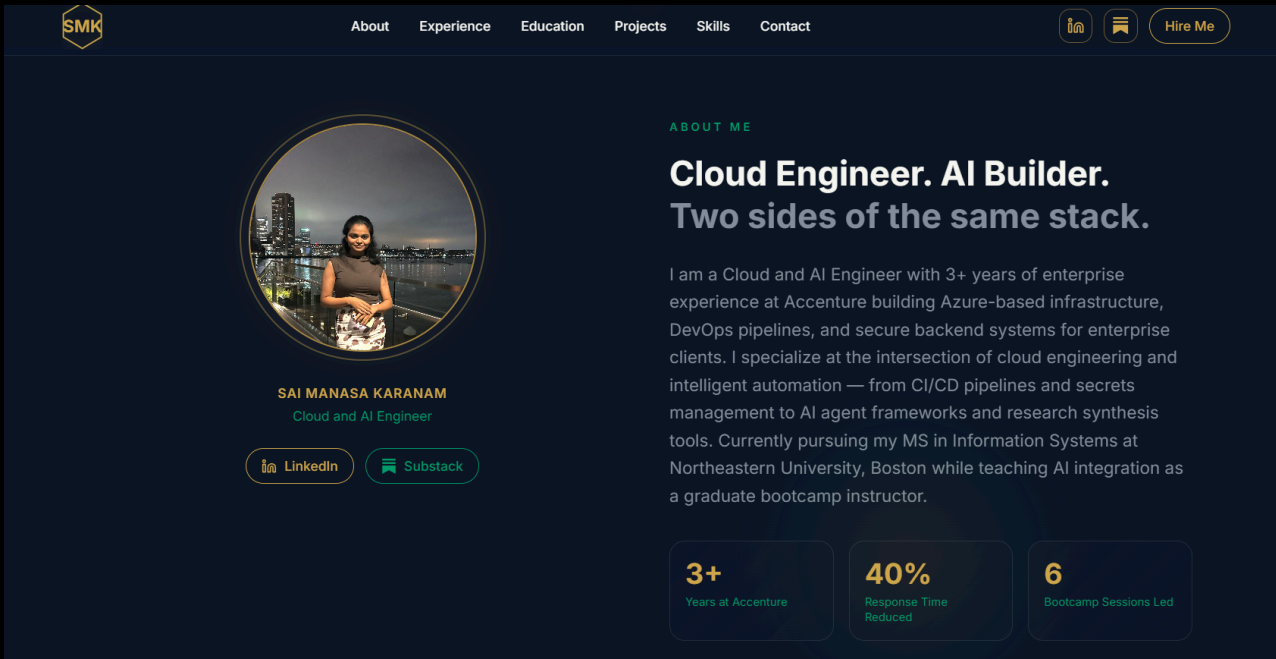

Projects Showcase:

- Visually appealing project cards for:
 - CloudPath AI
 - MediGraph AI
 - Smart Apartment Finder
 - Prism AI
 - ApartmentHub case study

Skills Section:

- Well-organized tech stack represented by categorized pills

Live URL: [\[Your Website URL Here\]](#) (Displayed prominently)

Projects Portfolio

CloudPath AI

AI career roadmap generator utilizing Groq API, Llama 3.3 70b, Streamlit, and Python to provide personalized 30-60-90 day roadmaps.

MediGraph AI

A cloud-native healthcare knowledge platform using Snowflake, Neo4j Aura, Python, SQL, and Cypher for NLP to database query translation in EHR analytics.

Smart Apartment Finder

An AI recommendation system powered by Groq API, Python, and LLMs to deliver hyper-personalized apartment matches.

Prism AI

An automated research synthesis tool that leverages n8n, Google Gemini 2.5 Flash, and the arXiv API to reduce research time from hours to under a minute.

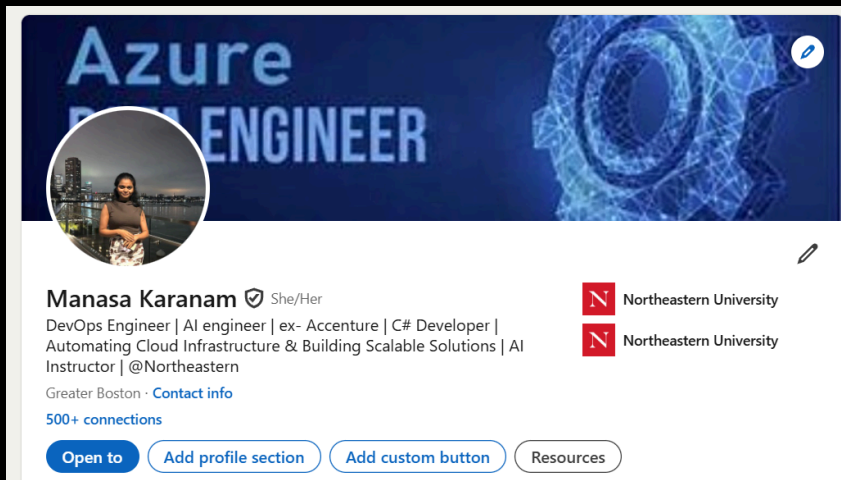

ApartmentHub

A full-stack database system with Microsoft SQL Server, T-SQL, Stored Procedures, Triggers, and Power BI for tracking the full maintenance complaint lifecycle with an analytics dashboard.

Profile Elements

LinkedIn Profile Showcase

- **Brand Banner:** Deep navy background with a teal tagline and SMK monogram.
- **Professional Headshot:** Striking image set against the Boston waterfront at night.
- **Headline:** Cloud and AI Engineer — Bridging Cloud Infrastructure and AI Implementation.
- **About Section:** Begins with a compelling brand story.
- **Featured Section:** Direct links to personal website, CloudPath AI, and a Substack article.
- **Experience:** Showcases roles at Accenture and tenure as a Northeastern bootcamp instructor.
- **Skills:** Endorsed proficiencies in Azure, DevOps, Python, n8n, and various AI tools.

LinkedIn Content Examples

Demonstrating a Consistent Brand Voice: Direct, Technical, Honest, No-Fluff

- **Article Promotion**

Promote a new article with a compelling title and a brief, engaging text explaining its relevance. "The Cloud-AI Gap Nobody Is Talking About But Everyone Is Feeling" - a piece on Substack addressing the disconnect between cloud and AI engineering.

- **Career Story**

Share a personal career narrative, highlighting key decisions and their outcomes. Example: Turning down a promotion for further education and the subsequent journey.

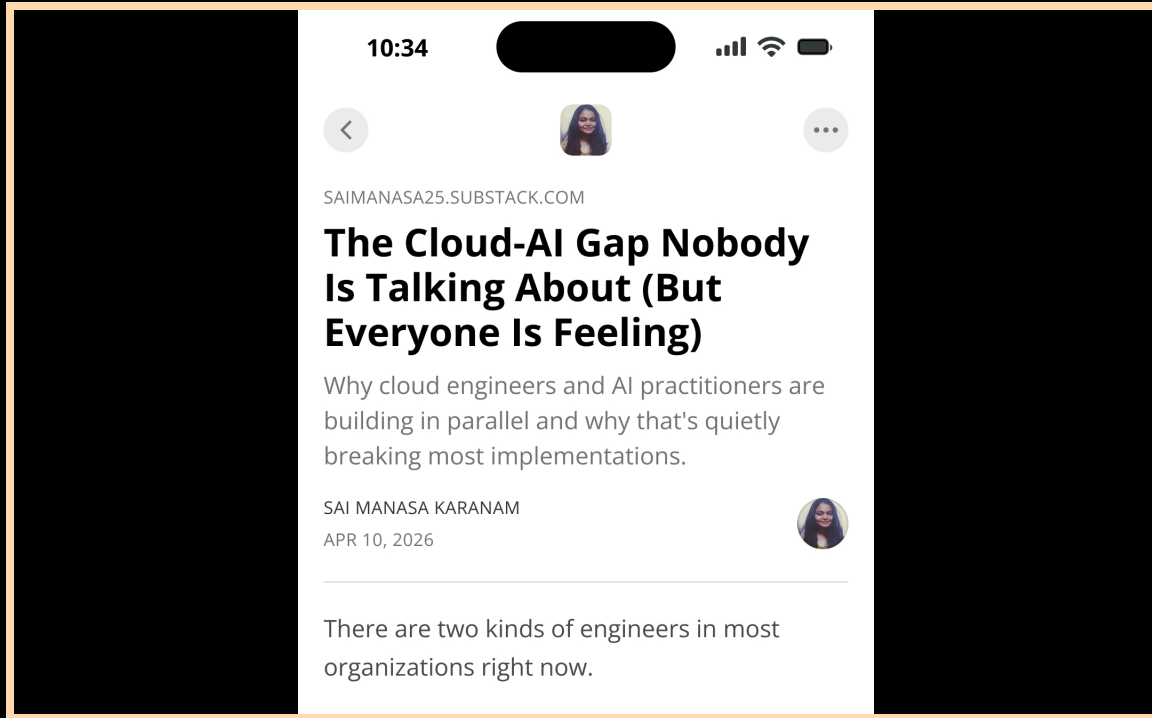

- **Product/Tool Launch**

Announce a new product or tool with a clear value proposition and a call to action. E.g., an AI tool generating personalized career roadmaps.

Brand Voice: Consistent across all posts — direct, technical, honest, no fluff.

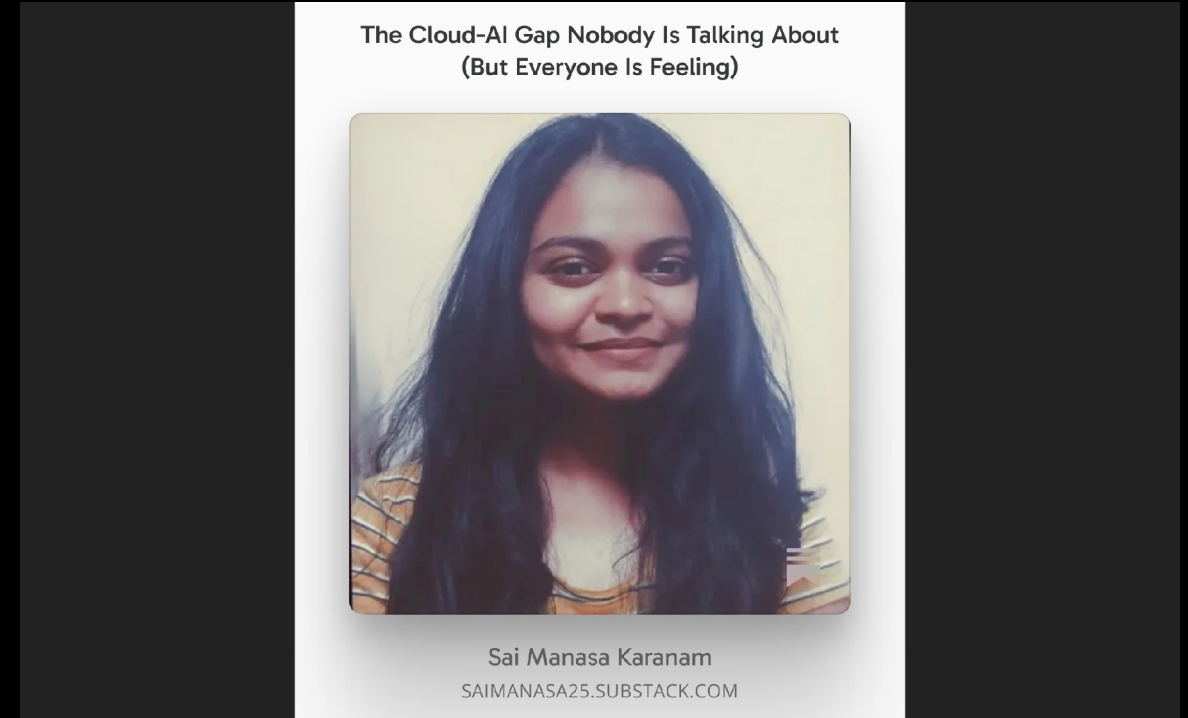

Substack Publication Showcase

Sai Manasa Karanam — Cloud and AI Engineer

Featured Article: The Cloud-AI Gap Nobody Is Talking About But Everyone Is Feeling.

Explores the disconnect between cloud infrastructure and AI engineering, leading to deployment failures. Published April 2026.

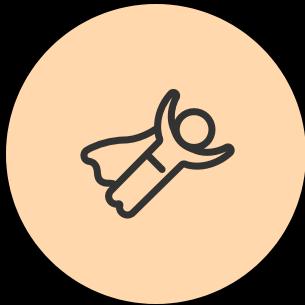

Thought Leadership on LinkedIn

Demonstrates Sai's credibility and engagement as a voice at the intersection of cloud and AI.

Brand Consistency Audit

Digital Touchpoints Reinforcing a Cohesive Brand Identity

Website Hero Section

Features a deep navy and teal color palette, the SMK monogram, a tagline about bridging cloud infrastructure and AI, and professional photography.

LinkedIn Header

Mirrors the website's hero section with the same color palette, monogram, tagline, and professional photography.

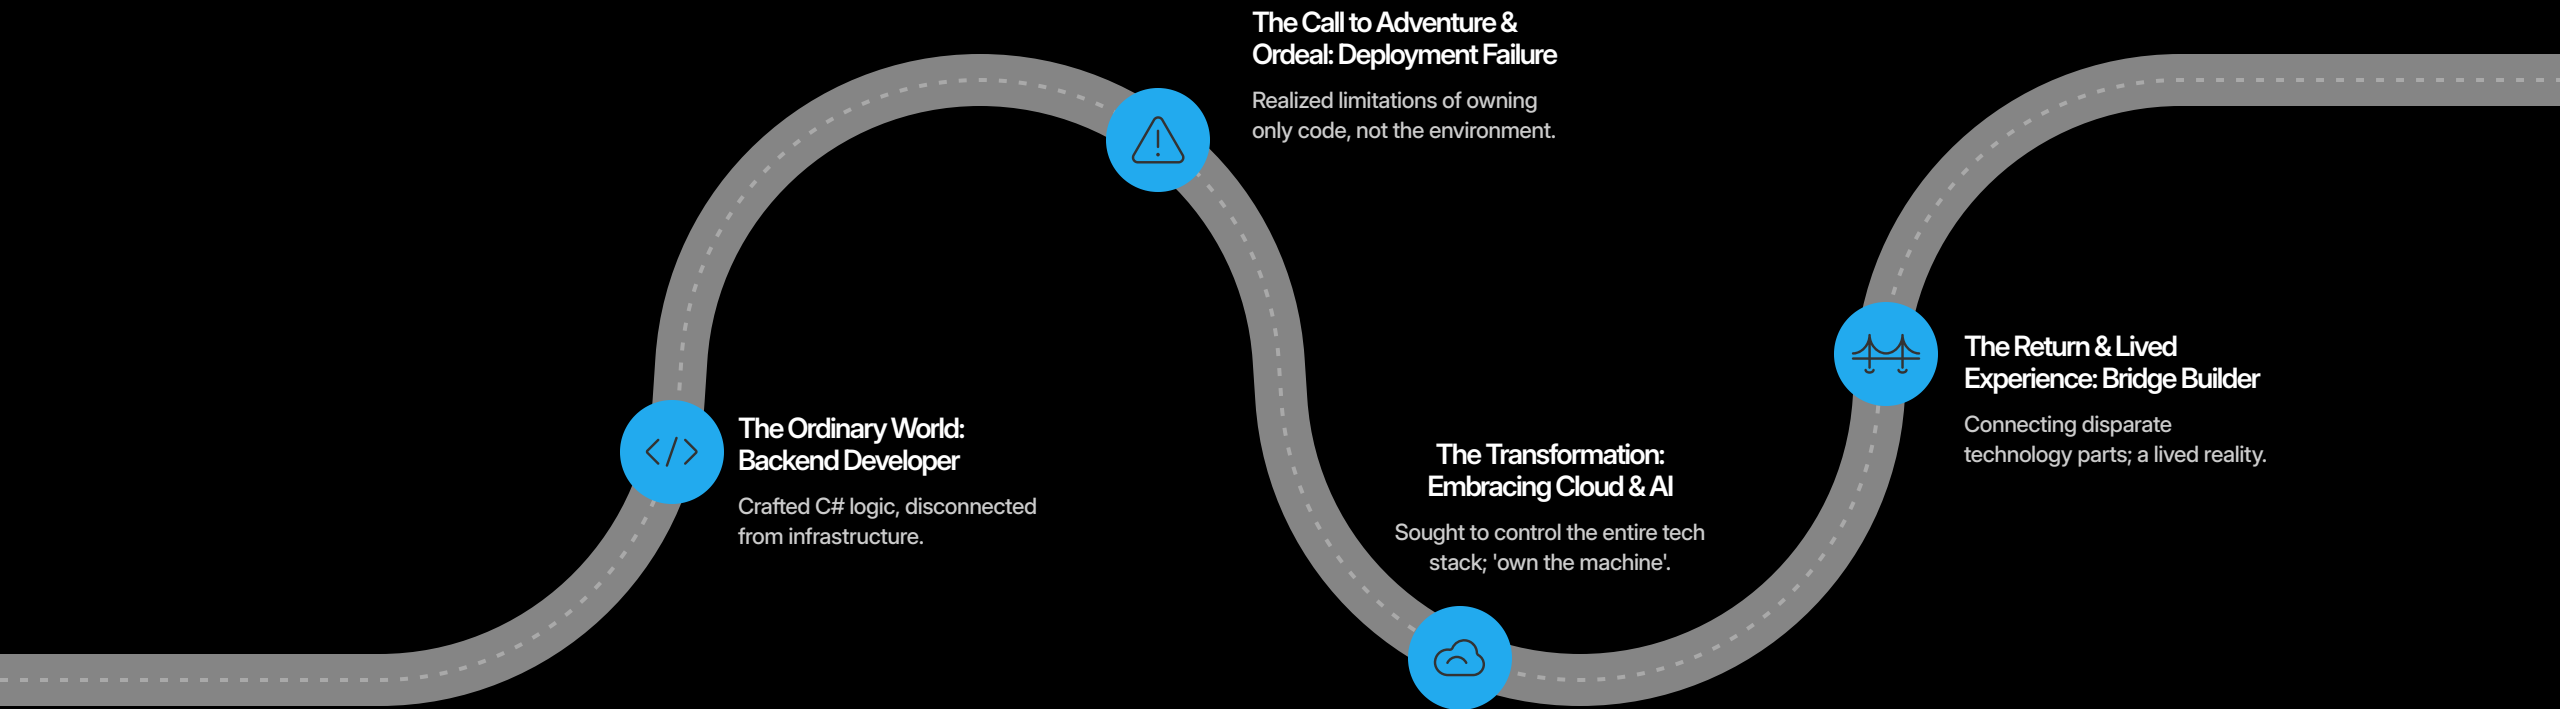

Substack Header

Consistent with other touchpoints, it includes the deep navy and teal palette, SMK monogram, tagline, and professional photography.

Every digital touchpoint reinforces the same brand, creating a unified and professional impression for all stakeholders, including potential employers.

From Backend Developer to Cloud and AI Engineer: A Hero's Journey

Milestones of Transformation

Brand Storytelling: Rags to Riches

The Opportunity: Received an official promotion to Senior Analyst at Accenture after three years of dedicated work and rapid advancement.

The Crossroads: Recognized a potential career ceiling and saw the emerging convergence of Cloud and AI as a transformative field.

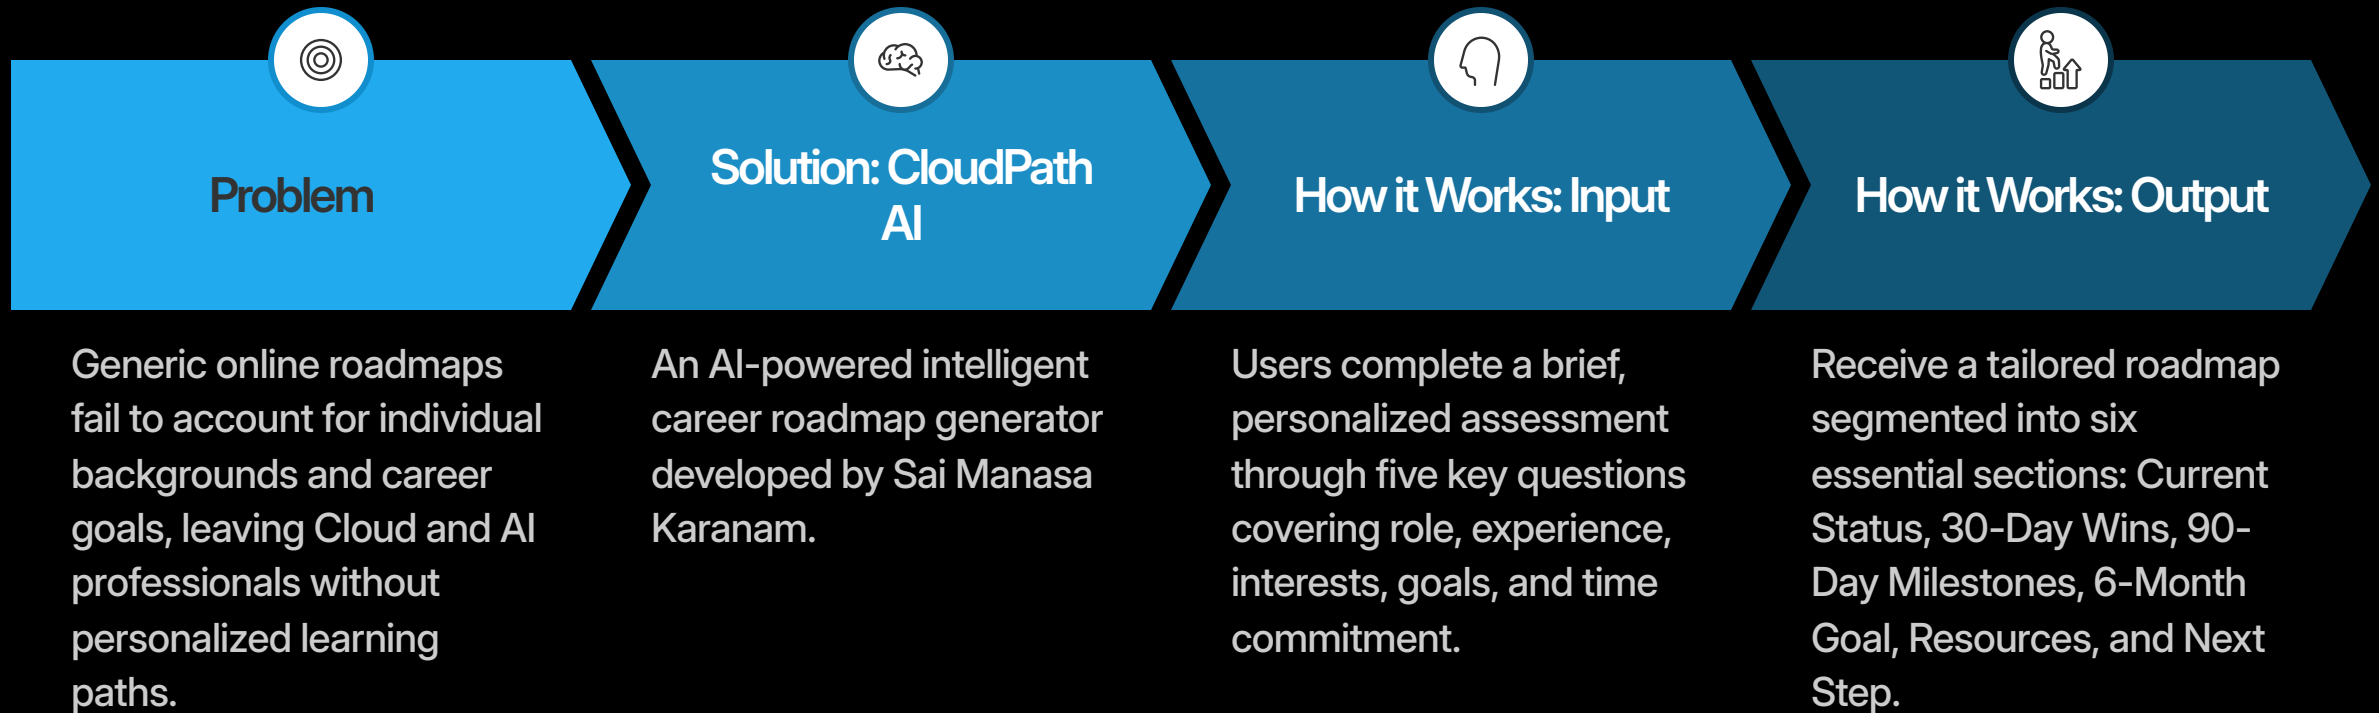

The Bold Decision: Declined the promotion to pursue a Master's degree at Northeastern University in Boston, positioning myself at the forefront of technological innovation.

The Vision: This pivotal choice underscores the authentic 'why' behind the pursuit of an MS degree and the development of the CloudPath AI tool.

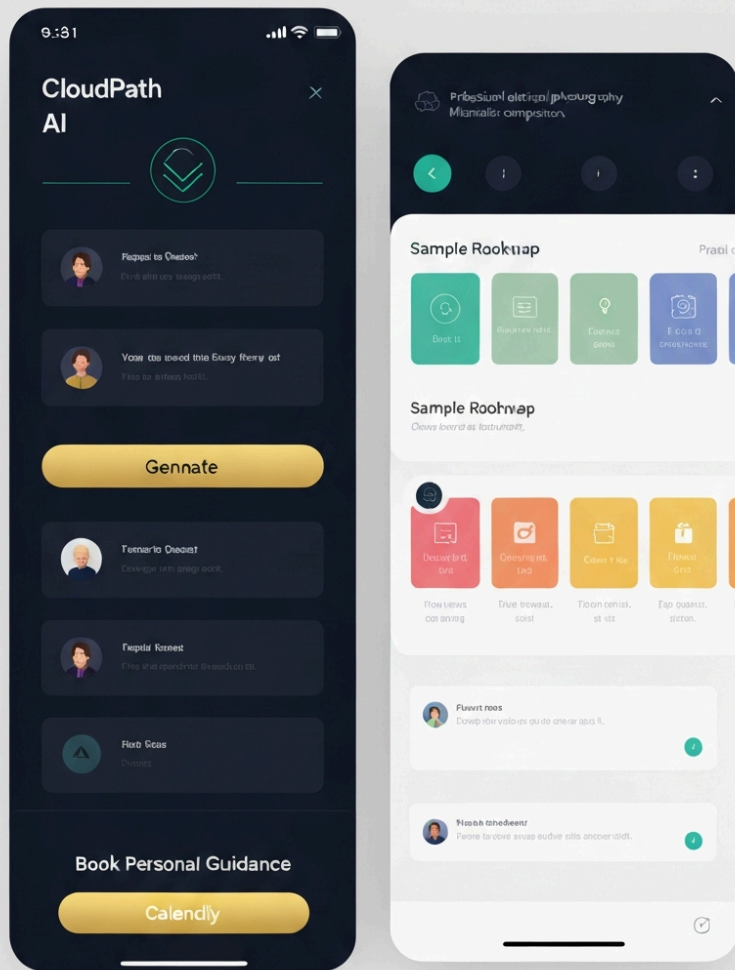

The strategic bet is still unfolding, with a commitment to ongoing growth and achievement.

CloudPath AI: Personalized Learning Paths

An intelligent career roadmap generator for Cloud and AI professionals.

Powered by Groq API, Llama 3.3 70b, Streamlit, and Python. Access the tool at [cloudpathai.streamlit.app](cloudpathai.streamlit.app).

Key Features & Benefits

CloudPath AI: Your Bridge to the Future

- **Intuitive Interface:** Engage with five question cards designed to guide your AI journey.
- **Personalized Roadmap:** Visualize your path forward with a dynamic six-section roadmap.
- **Direct Extension of Bridge Builder:** CloudPath AI embodies the Bridge Builder pillar, enabling professionals to navigate from infrastructure to AI, just as Sai did.
- **More Than a Tool:** This is the Bridge Builder brand brought to life—functional, actionable, and transformative.
