

Title: TriagePilot

Stop trying to automate the conversation. Start automating the exhaustion.

Built by Manav Kheni | AI & Cloud Architect

Agenda

Brand Strategy & Positioning

Visual Identity System

Digital Execution & Consistency

Social Media Strategy & Voice

Brand Storytelling

TriagePilot:Live Demo

Brand Strategy & Positioning

- Positioning:** *TriagePilot is a transparent orchestration engine that automates manual triage for high-volume teams, delivering 95% faster routing with auditable logic.*

Feature / Capability	 TriagePilot (Us)	 Intercom Fin	 RightResponse	 ResponseScribe
Core Market Focus	Agile, High-Volume Teams	Digital-First SaaS	E-commerce / Reviews	SMB / Service Businesses
Image/Visual Analysis	✔ Native (Built-in)	✗ Limited	✗ Text Only	✗ Text Only
Deployment Speed	⚡ < 10 Minutes	🕒 1-2 Weeks	🕒 Days	🕒 Days
Data Architecture	🔒 Self-Hosted (n8n)	☁ Cloud Only	☁ Cloud Only	☁ Cloud Only
Pricing Model	\$ Flat Low-Code	\$\$\$ Per Resolution	\$\$ Tiered	\$\$ Per Draft/User
Logic Customizability	High (Visual Nodes)	Medium	Low (Rigid)	Low

Audience Personas:

- The Overwhelmed Support Director:** Drowning in text tickets.
Fear: 50% agent turnover due to burnout.
Reads: Harvard Business Review; searches "Zendesk automated routing."
- The Skeptical Enterprise CTO:** Refuses to deploy "black-box" AI.
Fear: AI hallucinating to a VIP client, causing churn.
Reads: Hacker News; searches "self-hosted AI compliance."

UVP: Transparent AI Orchestration

Brand Pillars:

- Architectural Transparency
- Multi-Modal Capability
- Human-Centric Efficiency

Visual Identity System

- **Theme:** Premium Dark Mode (Enterprise-Grade Tech)
- **Core Colors:** Canvas Slate, Neon Lime, Node Indigo
- **Typography:** Inter & JetBrains Mono

TriagePilot
TriagePilot

Digital Execution & Consistency

• **Goal:** A unified visual identity across product landing pages, thought leadership, and professional networking.

Social Media Strategy & Voice

- **Primary Platform:** LinkedIn.
- **Rationale:** TriagePilot is enterprise B2B software. Our buyers (CTOs & Support Directors) are not scrolling TikTok for infrastructure solutions; they are on LinkedIn reading technical case studies.
- **Brand Voice:** Direct, highly technical, and empathetic to the engineer's plight.

Brand Storytelling

Framework: Overcoming the Monster

- **The Monster:** Skilled engineers spending 80% of their shift doing soul-crushing manual data entry.
- **The Strategy:** Automate the exhaustion, not the empathy. Move AI to the back-room.
- **The Transformation:** Manual triage reduced from 14+ minutes to under 2 seconds.

The Use Case – Saving the VIP Client

Framework: The Quest

- **The Scenario:** A VIP client submits an urgent 500-error screenshot during a massive Q4 product launch.
- **The Black-Box Failure:** Standard AI chatbots fail to read the image, misroute the ticket, and the client threatens to churn.
- **The Glass-Box Hero:** TriagePilot reads the screenshot instantly and routes to Tier 3 Billing in 1.2 seconds.

TriagePilot: Live Architecture Demo

- **Core Methodology:**

- Multi-Modal Data Acquisition (Text + Vision)
- Deterministic Orchestration (n8n)
- Transparent "Glass-Box" Logic
