

Your marketing co-pilot. In 15 seconds.

SpendSignal.ai is an AI-powered decision intelligence platform. Upload your ad data — get prioritized actions with confidence scores. No dashboards to learn. No reports to build. Just answers.

Upload your data → Get clear actions in **15 seconds** — every recommendation scored with a **confidence score**

HOW IT WORKS

01 CONNECT

Drag & drop CSV from Google Ads, Meta Ads, or your CRM export.

02 ANALYZE

AI cross-references every campaign, keyword, and metric in ~15 seconds.

03 ACT

Get prioritized actions sorted into four clear signals, each with a score.

THE 4-SIGNAL FRAMEWORK

STOP

Kill it.
Burning money.

FIX

Potential exists.
Something's broken.

INVEST

It's working.
Scale it up.

OBSERVE

Not enough data.
Watch, don't act.

CONFIDENCE SCORES — WHEN TO TRUST THE AI

90–100%

Act immediately. Strong signal. Clear pattern. Trust the recommendation.

70–89%

Proceed with caution. Good signal. Worth reviewing before executing.

< 70%

Wait for more data. Not enough evidence yet. Let the campaign run longer.

KEY FEATURES

◆ Multi-Source Intelligence

Analyzes your Google Ads, Meta Ads, CRM, and SEO data together — not in silos. Most tools see one data source. We see the pattern across three.

◆ Confidence Scoring

Every recommendation comes with a 0–100% confidence score. You know when to trust the AI and when to wait.

◆ Email Report Delivery

Results delivered directly to your inbox as a branded PDF report — shareable with your team or leadership.

GETTING STARTED IN 60 SECONDS

1. Visit `spendsignal-omega.vercel.app`
2. Export your campaign data as CSV from Google Ads or Meta
3. Drag the CSV into the upload zone — no signup required
4. Review your prioritized STOP, FIX, INVEST, OBSERVE actions
5. Receive the full PDF report via email (optional)
