

INFO 7375 · Boston · May 2026

Gunashree Rajakumar.

I turn AI demos into production systems that scale.

Senior Software Engineer — AI Systems · MS CS Northeastern

AVAILABLE MAY 2026

Aiera × Anthropic · Wall Street · 10K+ Req/Min

Who I'm Talking To

Every great brand knows its audience. Mine is precise — and I speak their language fluently.

THE RECRUITER

"Show me impact, not just titles."

What they care about:

- Quantifiable outcomes over job descriptions
- Recognizable company names and brands
- Speed to productivity and cultural fit

↓ I deliver exactly this ↓

What I give them:

- Metrics: 10K+ req/min, 35% latency reduction
- Aiera, Airtel, Flipkart — names that land
- Portfolio live today, chatbot live right now

THE ENGINEERING MANAGER

"Can you own this end to end?"

What they care about:

- Production-grade systems, not demo code
- Ability to ship without hand-holding
- Deep AI/ML fluency with systems instincts

↓ I deliver exactly this ↓

What I give them:

- MCP integration shipped for Anthropic officially
- Fraud detection at sub-50ms, RBI-compliant
- Full-stack ownership from data to deployment

My Unique Value

"I build AI-driven systems that turn complex data into actionable outcomes — at production scale, with institutional-grade reliability."

Most AI engineers can demo a chatbot. Few can architect the infrastructure that serves it reliably to Wall Street analysts at 10,000 requests per minute. That gap is where I operate.

01

Systems Thinking

Full-stack perspective from raw data ingestion through model inference to production deployment. Architected for scale from day one.

BRAND PILLAR 01 · INFRASTRUCTURE → SCALE

02

AI Integration

LLMs, RAG pipelines, and MCP servers — not in Jupyter notebooks, but in systems serving real users under real load.

BRAND PILLAR 02 · LLMS → PRODUCTION

03

Execution Speed

Ship fast. Scale reliably. Measure everything. Close the loop between engineering velocity and business outcomes.

BRAND PILLAR 03 · NOW → DEPLOYED

COMPLETE BRAND STRATEGY DOCUMENT

Brand Strategy

UNIQUE VALUE PROPOSITION

I build AI-driven systems that turn complex data into actionable outcomes — at production scale, with institutional-grade reliability.

TARGET AUDIENCE

The Recruiter — Show me impact, not titles

The Engineering Manager — Can you own this end to end?

BRAND PILLARS

- 01 Systems Thinking — Infrastructure → Scale
 - 02 AI Integration — LLMs → Production
 - 03 Execution Speed — Now → Deployed

CAREER POSITIONING

Senior AI Systems Engineer · Available May 2026 · Boston · NYC · SF · Seattle · Remote

HIGH RESEARCH · HIGH PRODUCTION · THE INTERSECTION

Where I Stand

**Junior Engineer**
Builds and ships features. Hasn't worked with large enterprise clients or deep AI systems yet.

Ships code ✓

No AI depth ✗

No big clients ✗

**PhD Researcher**
Deep academic knowledge of AI. Rarely ships to real users or works under production pressure.

AI knowledge ✓

Doesn't ship ✗

No clients ✗

**Senior Developer**
Strong execution and delivery. But AI systems and institutional-grade clients are outside their lane.

Ships fast ✓

Experience ✓

No AI/clients ✗

**★ THE INTERSECTION**
Gunashree Rajakumar
Ships production AI to Wall Street analysts. 10K+ requests/min. Alera x Anthropic. In production today.

Ships to users ✓

Deep AI ✓

Wall Street clients ✓

End to end ✓

★ The only profile that scores high across all five dimensions

Each axis represents a skill that companies actually hire for. The bigger the blue shape, the stronger the profile.

 **The Insight:** Most AI engineers live in one quadrant. I live in the intersection companies actually need — where research fluency meets production-grade execution and institutional proof of delivery.

Strong brands are built on proof, not promises. Here's my proof.

— Gunashree Rajakumar

"The proof of concept is already in production."

How Branding Made My Work Visible

Before this course, I had 5 years of production engineering experience — Flipkart, Airtel, Ola, Aiera. Strong work. Zero visibility. No one outside my team knew what I built.

INFO 7375 forced me to ask: what does my work actually stand for? That question changed everything. I built a portfolio, a Substack, a live AI chatbot, a personal positioning statement. I stopped being an engineer with experience and became an engineer with a brand. That shift — from invisible to visible — happened in one semester, in a city where nobody knew my name yet.

Branding didn't change my work. It made my work impossible to ignore.

BEFORE BRANDING

Strong engineer. Zero narrative. Work invisible outside my team.

THE COURSE

INFO 7375 forced clarity on UVP, audience, and positioning.

THE BUILD

Portfolio live. Substack published. AI chatbot deployed. Brand defined.

THE RESULT

Portfolio live. Articles published. Brand with receipts.

Strong brands are built on proof, not promises. Here's my proof.

How Branding Connected Me to the Right Audience

STEP 1

THE BEFORE

Strong engineer. No narrative. My LinkedIn had titles but no story. Recruiters saw experience — not impact.

STEP 2

THE SHIFT

INFO 7375 gave me language for my work. UVP defined. Target audience identified — engineering managers and technical recruiters who hire for AI systems roles.

STEP 3

THE BUILD

Portfolio live. Substack launched. LinkedIn optimized. Every platform now tells one consistent story: I build AI systems that scale.

STEP 4

THE CONNECTION

Right people started finding me. Conversations changed. I wasn't explaining my background anymore — I was confirming what they already believed about me.

Branding didn't change who I am. It made the right people recognize me faster.

STREAMLIT

AI-POWERED

BUILT APRIL 2026

BrandIQ — My Madison AI Tool

Live personal brand analyzer — built this semester, deployed today. Proof that I don't just talk about AI systems. I ship them.

Anyone can analyze their personal brand in 10 seconds.

[BRANDIQ.STREAMLIT.APP](#)

[→ LIVE DEMO](#)

How It Works:

1. Enter Your Experience

Input your background, roles, and key achievements

2. AI Scores Your Brand

BrandIQ analyzes clarity, consistency, reach, and credibility

3. Get Strategic Action Plan

Prioritized recommendations to close the gap

Brand Score Analysis

Analyzes your digital presence across platforms and returns a quantified brand strength score with benchmarking.

Score Breakdown Charts

Visual breakdown of scoring dimensions — clarity, consistency, reach, and credibility — rendered as interactive charts.

Strategic Action Plan

AI-generated, prioritized recommendations to close the gap between your current brand and where it needs to be.

Built this semester. Deployed today. Live at [brandiq.streamlit.app](#)
